Introducing LEGO® Robotics Lab

Tuesdays 2:45 – 3:45pm at Eyer Middle School

Cost: \$85.00 for an eight week session

Dates: Feb 14th – Apr 3rd

(Maximum of 15 students)

The Robotics Lab is designed to introduce kids to the fundamentals of robotics and programming. Students will work in teams using the LEGO® Mindstorms system to complete programming challenges each week. From learning basic forward/backward commands to utilizing advanced logic to solve a problem your child will find this camp both challenging and extremely rewarding. On the last day students will be asked to have their robot complete a set of tasks designed to test their skills acquired over the previous 7 weeks.

If you have any questions about this lab, please feel free to contact Neil Schroder at Bricks 4 Kidz (610) 841-9352.

Here's how to enroll:
